

State of the Art Electronic Speed Controls

Your motor speed control solution provider!

www.dartcontrols.com

Dart Controls 123D and 13DV DC controls operate on input voltages ranging from 12 to 36 VAC and are ideal where cost and safety considerations require low input voltages.

Dart Controls 250 Series analog DC variable speed drive is the industry standard for features, versatility, and reliability.

Dart Controls digital DC speed controls now available with a proximity sensor input option.
