

Gear Reducer Repair Services

FACTORY QUALITY REBUILDS

Stator Sales & Service Ltd. delivers significant cost savings along with the performance advantages you expect with original factory repair. We'll inspect all mechanical components for wear, including bearing and seal seats. If during inspection we discover anything about your drive that is inhibiting its operation - such as the effects of using the wrong oil -- we'll point you in the right direction. To ensure original performance and maintain reliability, we'll replace all bearings and install new oil seals.

We test the completed assembly to rigorous standards.

- Test oil level as well as for leaks
- Test for correct reduction ratio
- Test motor phase balance
- Test high voltage on stator
- Test all electrical components
- Test brake coil if applicable.
